Your use of Usenet

http://66.102.9.104/search?q=cache:VEjFh2CPNC4J:en.wikipedia.org/wiki/Usenet+follow-Usenet-customs-and-*-r
needs improvement.

If you feel **compelled** to ask the same question
in MULTIPLE newsgroups, **this** is the preferred technique:

<http://66.102.9.104/search?q=cache:qHhBKJ-sXKYJ:en.wikipedia.org/wiki/Cross-post+adequately.answered+correct>

Your technique

is selfish and inefficient

The last half of this thread explains WHY
and fleshes out the (more acceptable) cross-posting paradigm:
