and
Gromit
mouse
pad.

John

Mine
doesn't like
smooth
shiny
surfaces.

Mine likes plain white paper
best.

Mine seems to prefer the Deutsch Aerospace
pad.

Mine works OK on my formica desk.
No need to use a mouse pad with an optical mouse.
Do not eat sandwiches on same desk, or at least clean after it.

My wife would have fits if I did that because it'll scratch up the desk. Ok,
mine is real wood (walnut, but a few decades old). And I never eat in the
office except for a couple of pears in the afternoon.

Formica is wonderful stuff, I have had this desk since 1983, done
outrageous things on it (including soldering etc), still flat and
scratch free. Top just looks new.
Mind you it was not new in 1983, came from a sale of the city of Amsterdam
office stuff IIRC.
Actually _coffee_ is the perfect cleaner for it, somehow the small particles
in the coffee scrape the dirt off.
It sees lots of coffee.

Formica is tough alright. I just don't like non-natural desk surfaces.

Re: Mouse survey

Re: Mouse survey

Yesterday I was pleased to see that our local Walmart (California) carries Douwe&Egberts coffee. Although, when I lived in NL I got used to Kanis&Gunninck and I haven't found that yet.
