Hi Guys,

Finally got the LCD to display a couple of chars. The problem actually lies in the initialization part of the datasheet. However the display only shows:

```
A A A A A A A x x x x x x x x x x
_ _ _ _ _ _ _ x x x x x x x x x x
x x x x x x x x x x x x x x x x x
x x x x x x x x x x x x x x x x
```

x denotes black boxes.

\_ denotes blanks.

How come these boxes exist?

.
