Remember hte old Colecovision power supplies from the '80s? Seemed like they were being sold by All Electronics and similar surplus places for years at \$5.95 a pop.

Funny though, I seen wall-wart versions of the Colecovision supply in a surplus store someplace.

On a similar note, a I converted a large 12V 1.5A transformer (I use for a number of things) from a wall tumour to a floor tumour with a linecord.
