

Where to buy inexpensive oscilloscope probes?

Source: <http://sci.tech-archive.net/Archive/sci.electronics.design/2007-05/msg00227.html>

Hi – the probes for my Tektronix 2215A (2 channel 60MHz analog scope) are starting to fail. I was just looking online and most probes seem to be cost more than my scope. I feel like cheaper, but adequate, probes should be around. Any suggestions? Best I've been able to find was \$51 for some an off brand 100MHz probe that looked mediocre.

Thanks!

–Michael
