Then again there's ebay ! The 89C52 should do the job IIRC.

http://cgi.ebay.com/5-x-ATMEL-89C52-Microcontroller-DIP-40-Cleaned-Erased_W00QitemZ23013155351200

5 of them for \$18 !

But then again there's this !

http://cgi.ebay.com/Burner-Free-8051-8052-Microcontroller-Evaluation-Board_W00QitemZ25011763974100ihZ

It looks perfect for your needs. I'd ask if they can supply a suitable
chip

although if it'll program the Philips 89C51, I'd expect it to do the
above

Atmel 89C52 as well

Thanks again Graham – I never even thought to check eBay.
