Can someone tell me why people on Ebay are bidding over \$50 USD for Windows 98SE? (Besides the usual auction fever.)
Why are people willing to pay so much for a really old op system?

It does qualify for an XP OS upgrade original OS.

I do keep an old 98 machine running myself, I got specifically to run older apps and games, and do DOS/IO stuff. Plus this machine (a mid sized uATX desktop Celeron-500) leaves a smaller power "footprint" than my full desktop systems.
