Hi All,

I would like to recommend a new web site, [www.wikicfp.com](http://www.wikicfp.com), which could help you to organize and share "Calls for Papers" on Electronics design and related fields.

Why not have a try?

<http://www.wikicfp.com/cfp/call?conference=electron%20devices>

<http://www.wikicfp.com/cfp/call?conference=communications>

What's special with WikiCFP ?

- You can have your own customized CFP list.
- It's easy to share your list with others.
- You can organize your list by sorting on various fields.
- You can browse CFPs with respect to categories.
- You can search CFPs by title, location or category.
- There are many other useful features.

I sincerely hope this new site will be helpful to you.

Best wishes,

Evie

.
