We've been getting an average of \$104.78 worth of free electricity delivered to our home... right over our existing electric company's power lines... every month for the past 13 years. We've shown thousands of people how to do this in that time, and we can show YOU how to begin doing the same thing within 30 days, with no investment, no matter where you live in the United States!

The rest of the info at – <http://tinyurl.com/2wqwjf> Enjoy!

And this is free information, right????? Cause surely if you really care about me that you'll offer this great information for free?
