I appreciate destructive comments.
What do you think?

Please do not give references to nasty URLs like above; it is
so browser hostile that i had to use power-off reset to regain
use of my PC.

Oops, may be time for a new PC ... or at least a new browser. Works fine
here. It's a regular htm file on his company's web server or provider.

Works fine here also. But I normally run Firefox with severely
throttled script capability.

Same here. Enjoying the new PC now. Someone suggested I should plunk down some more dough and get the
Intel dual-core. So I did and also upped to 2Gb of RAM. Had to do some Spice today. Man, this thing rocks

Re: A non-traditional use of LM431

and the fans didn't even speed up.
