Your stuff is so uglee, have to coin a new word: \*uglionics\* for what you do...

It has the compensating virtues of being fast, being hazard free, being simple, and doing exactly what was requested.

Measuring the ugliness of your designs is like evaluating 0/0. You belong to the Ladies Auxiliary of S.E.D. Hey, bring us another tray of those little triangular roast beef sandwiches with the crusts cut off... you do those so well.

John
