Is there a relatively inexpensive firewall that is **simple** to use and
understand?
Suggestions?

Use a router?

GRC rates me as "All ports are stealth".

...Jim Thompson

I understand that will help a lot – but seems to be impossible to use in a dial-up situation.
And yeah, i am rated the same, BUT my credit card was hacked and fortunately the bank caught it.
So i would like to add a firewall to help.
Now, if you could tell me how to add a router to my RS-232 line that goes to the modem...

.
