(Completely OT)

Do you have a leading space in the username on your new account?  
Google's archive is doing the strangest things with your posts.

On the front page of the group  
<http://groups.google.com/group/sci.electronics.design>  
you show up as "Anonymous".

Once the thread is opened,  
[http://groups.google.com/group/sci.electronics.design/browse\\_frm/thread/f48025bb1531284e/affbaced27828f80](http://groups.google.com/group/sci.electronics.design/browse_frm/thread/f48025bb1531284e/affbaced27828f80)  
your username disappears in the Thread frame  
as well as in the Body frame  
To see who posted, I have to click **\*\*More options\*\***.
