and for another the Little Ice Age seems to have been a Northern Hemisphere and largely a Northern Atlantic event, and not all that exciting in the context of global warming and cooling.

How the hell can you know that?

[http://en.wikipedia.org/wiki/Little\\_Ice\\_Age](http://en.wikipedia.org/wiki/Little_Ice_Age)

[http://www.grida.no/climate/ipcc\\_tar/wg1/070.htm](http://www.grida.no/climate/ipcc_tar/wg1/070.htm)

Tasmanian tree-ring data doesn't show any evidence of the "Little Ice Age" – I didn't personally check any of the trees in the immediate area where I grew up, but it has been done.

Special pleading/lying as usual by an AGWist.

People who know stuff do tend to do that.
