Don't encourage McIntyre – he needs to be persuaded to find something constructive to do.

Ah, the usual. When arguments and evidence fails the person gets attacked..

The evidence hasn't failed. McIntyre found a serious defect in Mann's data-filtering procedure, which meant Mann's hockey stick curve should have had more and bigger noise spikes down the handle, even though the shape remained much the same.

McIntyre is still dwelling on that old victory and really ought to move on. If this is an attack it's mild compared with the allegations that you and Eeyore throw about.

Re: OT: interesting global warming quote found elsewhere

Re: OT: interesting global warming quote found elsewhere

Somebody who won't drop what he is doing to give you old raw data that you couldn't use is "arrogant" rather than sensible. See if you can retrieve your sense of proportion sometime soon.
