Poor baby, you're just full of excuses. No one will hire you because you're incompetent. Face up to it, go over and sit in the corner and suck your thumb ;-)

Jim-out-of-touch-reality-Thompson thinks I'm not being hired because I'm incompetent. When he expresses an opinion outside of electronic design he's wrong almost all the time, and he's failed to get it right this time too.

This is another example of why people give you so much shit. You can't just say you disagree with Jim, you have to be the biggest asshole on the newsgroup about it. Jim is working. You aren't. Jim is working state of the art. You barely remember the art. Every time you post another attack on someone's skills, it shows how little you are capable of comprehending, these days. Rather than ask questions about new technology, you drone on about the antiques you worked on. How often do they sell a brand new Electron Microscope built on a 35 year old design? If anyone is out of touch with reality it's you, for thinking your outdated skills still matter. You should join one of the European antique radio newsgroups. There you might find someone who appreciates your out of date skills.

Re: OT: Why welfare doesn't work!

If you have broadband, your ISP may have a NNTP news server included in your account: <http://www.usenettools.net/ISP.htm>

There are two kinds of people on this earth:  
The crazy, and the insane.  
The first sign of insanity is denying that you're crazy.
