160 Watts 5.29pints digital heated ultrasonic cleaner

Ultrasonic Frequency: 42,000 Hz

Tank Material: Stainless Steel SUS304

Tank Capacity: 2,500 ml (5.29 pint)

Power Supply: AC 100-120V 60 HZ

Power: 160 Watts

Heater: Temperature (65 degree in Celsius or 149 degree F.) with time controller

N.W.: 2.5 kg

G.W.: 3.0 kg

Product description

Powerful Industrial Grade 160 Watts Digital Ultrasonic Cleaner With Large Stainless Steel Tank And Heater

This brand new Large Industrial Grade Digital Ultrasonic Cleaner has powerful transducer, heater and large tank capacity for superior cleaning results, making it great for professional cleaning. It is the first utilization of digital program in ultrasonic cleaner to control the unit, according to the quantity and condition of the items to be cleaned to choose a working cycle. As a result, it is more convenient and the cleaning results are more remarkable! It is also the first ultrasonic cleaner to introduce radiator fan and circuit protector for prolonged operation.

For professional use:

Ideal for scientific labs, medical and dental clinics, tattoo shops, jewelers, opticians, watchmakers, antique dealers, and electronics workshops, golf club etc.

For personal and home use:

Ideal for

Jewelry, watches, rings, necklace, earrings, diamond, bracelets.

Glasses, sunglasses, contact lens accessories, optical lenses.

Dentures, combs, toothbrushes, electronic shaver head, razors, and

160 Watts 5.29pints digital heated ultrasonic cleaner

dining appliance.

Pen-heads, printer-heads, signature chops, watch parts, ancient coins, badges, valves, machine nozzles, small silverware.

electronics components, mechanical parts, and firearms.

Tattoo guns and tubes, and piercing.

Anything you can image to clean — it can even clean fruit like strawberry!!!

Unique Features:

Large & Lengthened tank — Suitable for long dental equipment and tube. Tank Capacity: 5.29 pints (2500 ml). Tank Size: 10.40" (L) x 6.46" (W) x 3.15" (H).

Stainless steel cleaning tank (material is Stainless steel SUS304).

Strengthened transducer makes the ultrasonic more powerful (42 KHz and 160 Watts cleaning power) and provides remarkable cleaning results.

Heater — Safety and reliable with temperature up to 65 degree in Celsius (149 degree Fahrenheit) and time (45 minutes) controller — significantly enhance cleaning.

Circuit protector — Protect the circuit to lengthen unit life.

Digital program, 5 working cycles; choose freely (90, 180, 280, 380, 480 seconds). It enhances cleaning efficiency and makes it easy to operate.

Radiator Fan — To protect every parts in good condition after working a long time.

Wet-proof PCB — Good to be used in lab.

Some Industrial spare parts being adopted, allows its working in long time frame, and in dampness environment.

Three separable wires — Safe and convenient.

Industry IC — To be steady in unstable voltage condition.

Strong plastic screen (material ABS 757) — Better water-proof and drop-proof ability than metal.

Power Supply: AC 100–120V 60 HZ.

Include detailed operation guide.

Brand new in factory sealed box shipped in a packing box for protection.

Certifications

CE, GS, ETL (USA), PSE

Specifications:

Cleaning Power: 160 Watts

Frequency: 42,000 HZ

Power Supply: AC 100–120V 60 HZ

Tank Capacity: 5.29 pints (2500 ml)

Tank Size: 10.40" (L) x 6.46" (W) x 3.15" (H)

Cycles: 90, 180, 280, 380, 480 seconds

Heater: Temperature (65 degree in Celsius or 149 degree F.) & with time controller
