Hello all,

I am sorry for taking so long to get back to you all. It has just been a rather busy week.

However I wanted to thank you all for the input. And, following the consensus, I will, hold off buying a DM44 for my 465B as I do not have the skill to install one, as well as that it simply sounds like a bad idea trying to add a DM to the Tek.

Thanks everyone. I appreciate the help.

Respectfully,

Sam
