Dear all,

Does anyone know anything about these Ailtech models?

AIL-13680 preamplifier
AIL-13610 Receiver

I tried googling for these models – but found nothing on them. If someone could kindly specify (roughly) what these models do ? That'll be great.

I'm guessing the 13680 is a voltage preamplifier with a 50Ohm input termination and the 13610 is a bandwidth limited receiver ?

Regards,
Andrew
