This still sure seems like spam.

Maybe the way to stop this spam is to present a competitor's page every time you post this one.

Try: <http://www.ladybug-tech.com/> At least they don't spam.

And, no, I am in no way related to this other company.

- * High Performance! NOT High Cost
 - o A replacement solution for conventional power meter and sensor.
 - o Simple USB connectivity to laptop or PC.
 - o Multiple sensors on same PC
 - o Light weight and easy to use.
 - o Good for all manufacturing and I&M needs
 - o Robust construction with high reliability
 - o No reference calibrator required.
 - o Measurement range from -50dBm to +20dBm up to 18.5GHz.
 - o Future products to 40GHz.
 - o Currently comes in two frequency ranges
