(<http://www.pop-sign-display.com/>) is professional lighting & display manufacturer in China. LED product is our main article.
Welcome to our websites: <http://www.pop-sign-display.com/>

LED Sign

Key Feature:

- 1.Excellent Visibility, Even in Daylight.
- 2.Long Life and Maintenance Free, Ultra High Bright LED with 100,000 Hour LEDs.
- 3.Simple Installation.
- 4.Plastic Frame With Rigidity & Light Weight.
- 5.Safe to Touch & Clean.
- 6.Extremely Low Power Consumption: 3~7W Max.
- 7.Changing Color for Attracting Attention.
- 8.Viewing Angle: 30 Degree, Viewing Distance: 150~250'.
- 9.1 Year Warranty!

LED Channel Letter

· Key Feature:

- Super bright with normal sign.
- Absolute 100% waterproof and corrosion prevention,enabling their normal working in all bad conditions.
- Modules connected without intermittence or socket, ensuring a constant and stable system voltage.
- Low quantity of heat, no toxicant produced.
- Low voltage, low power consumption.
- Free of maintenance within 5 years and the working life of the modules lasts 100 thousand hours.
- Working temperature:-20 degree to +70 degree.
- Storage temperature: - 30 degree to +80 degree

Led Display

· Key Feature:

- Multiple character sets: Capable of displaying English characters in 7 different fonts.
- Brilliant Eye-catching colors: Available in Blue, Green, White, Amber, Orange, Red and Multi-color.

- Multiple Display Methods: Messages can display in a variety of ways including directional swipes, instant on and scroll.
- Memory size: Approximately 7000 characters of memory space to store messages that can be displayed at preprogrammed times.
- Battery Back-up Memory: Battery back-up will save data for at least 6 month without power.
- Pre-programmed Graphics: The display comes with 8 pre-programmed full screen graphics, 8 pre-programmed animated graphics, a library of graphic symbols and memory space for 8 user-programmable graphics.
- Speed control: 8 different speed at which messages can be displayed.
- Networking: Network up to 128 units together for more effective information display management.
- Dual Time Display Formats: 12 and 24 hour time display formats.

LED Strip

- Single LED board with screw terminals for linking multiple modules
- Color: Blue / Green / Red / White / Aqua /Yellow/ Orange
- Powered by DC12V
- Size: 20mm x 37mm
