I'm looking for an ethernet Media Converter circuit to convert from UTP to coax (and back again). I have googled and failed. Any suggestions please?

I googled "balun ethernet" and got a few hits. Here is one:
<http://www.computercablestore.com/SearchResult.aspx?CategoryID=1115>

Great claim :-)
They pretend to perform full duplex over a single coax.
So there was no need to replace all those coax cables in the first place :-)
