I'd see if it works before trashing it for parts. It may just need new  
ink –  
eBay.

I'm running RH 7.1 Linux and it has no driver for this printer. The hp  
website doesn't have a Linux driver for it. So, there is no chance of  
my using it as a printer in the near future, even if I did feel up to  
trying to buy ink for it.

It may be very similar to another model.
