Perhaps inquiring as to the nature of the application? Nahhh...  
It's like all the stupid questions you ask; you don't care about the application or the tech of it, all you're doing is fishing for minutiae that you can try to use to bring folks down with.

Why would I want to behave like a complete asshole such as you? YOU are the one who goes and tracks people's IP addresses back in a desperate effort to find out where they live so you can use that to bully them. Over and over you have shown yourself for what you are, a stupid nasty bully, a malicious fool and a blowhard.

Why is a perfectly reasonable question in a public forum. But perhaps your ego doesn't allow you to stop and ask the most obvious questions. What a dreck of a person you are.
