

Need a Schematic for an Alps MD 1000 printer

A conversation via e-mail with Alps a while ago only produced the suggestion that I call their 800-number to be told how to test the printer and to return it for "service" if that didn't "resolve the issue". I'm a engineer who's done a bunch of debugging of digital circuits and that kind of "service" wasn't helpful. Are there any on-line resources for the schematics I'd need?

TIA
