You probably should buy the one on eBay, \$10.50 right now. Those are a little bit hard to find.

Even harder to find are the digital 2700 series radios, but if you had one of those my parts would work in most of them.

Yours is a different animal.

We seem to agree on cars, I have an 87 LeSabre I wouldn't trade for a new Cadillac. Just wish I could find the fuse for the rear defogger.
