I got the pages pasted together with PhotoShop today and printed it out on our plotter at work. Now all I have to do is find our local native Arabic speaker. He was out of his office every time I tried to find him today, but I'm pretty sure this is Arabic. It will be interesting to see if it tells us what this is actually for.

I'll let you know what I find out.

Oh, yes, I remember, and sometimes regret, the demise of BBS. I guess that I have to admit that Newsgroups are even better, however, because the audience is larger. Well, USUALLY that's a good thing. ;-)

Wow, that certainly sounds like it might have required a lot of effort. Did you have to run thru lots of CDs, or do you have an index that is more readily accessible?

At any rate, I'm still looking for a schematic for a Sony AC-220.

Thanks very much for all your efforts, Ken.
