Until Dec 1, 2005 a 15.00 donation buys one full year membership. After that, the price will go to 60.00 per year, 20.00 for 3 months and 10.00 a month to help cover server costs and maintenance. The 10 and 20.00 signups will have some limitations per day. At the moment there is 30gigabytes of schematics and tech tips and will soon swell to over 70 gigs. Download what you need and share what you have. Not a scam and no one trying to get rich and bail out! You're paying for the privilege of taking part in one of the best resources technicians have ever had available. The choice is easy. 15.00 once, or go the next year begging people to look up a part number for you. This IS the big picture! With broadband, you could recoup your 15.00 in 30 seconds. It's a no brainer. [www.techdata-kicksass.net](http://www.techdata-kicksass.net)
