At about the time of 2/25/2006 4:47 AM, kip stated the following:

Are we supposed to guess the Make Model and the Part Number
Supply use with those including the location and maybe we can
give you some information as to were to obtain a replacement.

I have a CRT Tube socket that's arc'ed pretty bad internally. It causes
large areas of the picture to black out. If you hit it, it comes back
then goes again. I contacted the US rep and they don't sell parts.
They quoted me \$75.00/hour + parts + shipping. Ouch. Anyways, I took
some pictures of the part and posted them up on my web site. These
images are pretty big though at ~900KB or so.

<http://home.pacbell.net/dcrudy/p1010014.jpg>

Any suggestions as to an equivalent part I could replace it with?

strip view finger mount fcsk more fcsk yes spray amount sleep

Oh, sorry.

Re: CRT Tube Socket

It's a computer monitor. Impression 9 Plus.
