Did you remember to press the TV/VCR button on the VCR remote?
No cable? yagotabekiddn

Got rid of 20 year old set the other day and got a new Insignia IS-TV040919 \$89 at best buy. Old set had a 2 year old Allegro ABV441 DVD/ VCR combo hooked up with quite a few adapters to make it work with the 20 year old tv but work it did both VCR and DVD played just fine. Old system not hooked up to cable. Rabbit ears :) Hooked up the Allegro to the new Insignia and tv works fine, DVD part works fine and I can play retail and previously recorded VHS tapes. No cable hook ups on this either, rabbit ears.

Insignia has 3 vertical rows in back of tv.

1. In – yellow, white and red
2. Component – green, blue and red
3. Out – yellow, white and red

Allegro DVD/ VCR has 4 vertical rows in back of unit

1. VCR In Line 1 – red, white and yellow
2. DVD/ VCR Out – red white and yellow
3. Component – red, blue and green
4. Audio Out – red, white and blue

I made my first connection with the Allegro row 2, DVD/ VCR Out to the Insignia row 1, In.

Under this set up everything worked as I mentioned above DVD, TV etc except that I was unable to record from the TV to VHS tape, just noise.

I left that connection as is and then hooked up Allegro row 1, VCR IN Line 1 to the Insignia row 3, Out.

Still can not record to VHS tape. I could be wrong but I believe that I

Re: Help With New TV And External DVD/ VCR Combo

am doing something wrong while trying to set up the VHS part of the equation if in fact those connections I have made are the right ones.
Thank you.
