Hello All,

Delco 2700 series, 16006776

Looking for a repair person on these, prefer in Canada.

I have 2 which both power on and LEDs OK. 1 has faint sound at Max Vol and other none.

I suspect the amps for both. I have the the complete Delco circuit diagram but I am no expert electronics tech. without tools.

Just have a basic multimeter.

Any contacts appreciated.

Thanks,

John
