Hi Group, I'm repairing a 17" LCD and can't seem to obtain a 2SC5707 in
Australia. Does anyone know of an equivalent? Ta Mouse

Make and model of LCD?

I have noticed a number of requests for 2SC5707's for 17" LCD's so
they may be prone to failure. It might be a dud PSU design which is
causing a high 5707 failure rate.

Would it be a Dell/Benq 172fpb?

.
