Hi guys,

I am having trouble finding a replacement mirror for a Sony model number KP-46C36 rear projection tv. Can somebody help me with this. Can I go to a local glass shop and get a mirror cut, or does anyone have anywhere where I can get a mirror. Any Suggestions would be appreciated. Thanks

Have you tried Sony? They've been pretty good for parts when I needed things. You'll need a front surface mirror, but other than that there isn't anything special about it.
