Buck Turgidson ha escrito:

I am not very tech savvy and up on the latest stuff. I have had bad

luck

with VCRs lately, and am too cheap to pay the monthly Tivo fee. Do DVD recorders allow a DVD to be re-written over and over like a video tape? Are they are viable replacement for a VCR?

Thanks for any help.

Yep! You can buy a DVD recorder and use DVD-RW or DVD-RAM media with it, and record over and over the same disc, just like a VCR tape. Also, you can use DVD-R media, but that is a write once media.

All in all, a DVD recorder is better than a VCR.

What would you say the number of write/read/erase cycles could you go through before excessive dropout or whatever finally stops the repeated use of one disc. ? How many cycles before the play quality is noticeably downgraded but still playable . ?
