In article <GaryJ.2omk1c@xxxxxxxxxxxxxx>, GaryJ.2omk1c@xxxxxxxxxxxxxx says...

I have salvaged DC Motor (Copal) from and old floppy disc drive. However I don't have any information on them. It is an LC-177B. I also need a control circuit for it. I am building an inductor winder for guitar pickups.

Regards  
Gary

www.scientificsurplus.com sells that motor. Maybe you could email them for a spec on it.
