Ward De Backer wrote:

Hi,

I'm looking for the schematics / service manual for a LCD backlight inverter.

Manufacturer: Ambit
Type: T50I028.00 REV:2

I googled for this but without success so far ...

Can someone help me with this? Thanks in advance!

Best regards
Ward

It's very likely the schematic has never been published, those inverters are not normally repaired. Best bet is to just use standard troubleshooting procedures, you can probably find datasheets on most of the components it uses.
