OK, I guess it is too advanced for yall.

Incidentally, when the people show up with spam, how come there are no responses. I could be accused of being off topic, and this death threat thing I just don't get. All the people who want to bitch about me, and basically call me a bitch, well they hide under the same anonymity I do. And for street smarts, I am not even going into it. Want my name and address ?

I thought we could have an intelligent discussion about amplifier power and a few other things relating to getting the maximum performance without having anything fail. Perhaps some people do not see the logic in starting such a discussion in a newsgroup where people generally deal with failures of electronic equipment all the time.

I see one person wanted to discuss the subject. But first the death threat. I stated that if someone wanted to kill me I have people to help me get rid of the body. That is a threat to defend myself. If you take it another way you must be some kind of defective. Call me from the airport or bus terminal in Cleveland and we will surely discuss this "death threat".

Of all this bullshit bitching about me, nobody seems to do anything about the spammers. But I am all they can get to. And nobody here can hurt my feeling I assure you ALL. You might annoy me with your bullshit, but that is a part of life. You can't hurt me from here. You can't hurt me from here either. Get the point ? My ego is not false.

Now I would like to make a request. I request that any motherfucker who cannot design or build an amplifier get the fuck out. You SAW the FUCKING SUBJECT OF THE POST. If you do not like this thread get the fuck out. That is it. I have every right to be here. I have every right to make this thread, and nobody is going to stop me.

Now there was one poster who seemed to be interested in the subject.

Now the others will see. You want to see a jerk, a bozo ?

Re: Want to build an amp

Bye thread.

Terminator
