Have

a 500 watt 24" baseboard heater. Can this be wired to a 110
circuit
instead of a 220?

Thanks Jerry

Yes, but it won't put out very much heat. You can get 120V baseboard
heaters, they're not very expensive.

Where can I get a 110 heater?

I bought one at the local McLendons hardware store, anywhere that sells
baseboard heaters should either have them or be able to order them.
