Waterproof – if your Swiss replica watch claims to be waterproof, it means there is no possibility of entering water.

Stainless Steel – a shiny durable white metal which is not affected by corrosion or rust. Almost all fake Rolex have option of steel.

Stop Watch – this is a second hand that measures intervals of time in the replica watch.

Strap – this is also called a band any Swiss replica watch has in either cloth, leather or other non-metal material.

Subdial – A small dial used for keeping track of elapsed hours or minutes in your fake Rolex.

Digital Watch – this is a replica watch that checks the time using digits not hands.

Dual Time Zone – A Swiss replica watch that measures more than one time zone.

Battery – this is provided for the power in your replica Rolex.

Bezel – The bezel is that portion of the case that immediately surrounds the outside of the replica Rolex watch crystal.

Crystal – this is the glass that covers the face of your Swiss replica watch. Two main crystal types which are used in replica Rolex are Mineral and Sapphire.
