got a video machine, video tape is not coming out..

I found a post about this possibly being a weak power supply issue..

make? model number? approx. age?

it would be better if your response was useful to others too, with other makes of video machine.
e.g. if you have in mind sources of power supplies and websites covering various makes.

Anyhow,
mine is Sony SLV D950

could be 5 years old

.
