Just checking how quickly this post appears on the server. The 'new' one that NTL have switched to, doesn't seem anything like as quick at picking up posts from other servers, as the old one was. I don't suppose this check will prove much, as I am actually on this server in the first place, but it might be interesting to see how long it is before other servers can see it, as again, the old server seemed very good at getting my posts 'out there'. Local time here is 13:52 (12:52 UTC)
