You highly over-rate your own sociability index. When Dr. Constipation is the only one conversing with you, I think we have the measure of your intellectual input.

sci.energy.hydrogen: Re: Does Psalm 110 really work for Big Industry?

You still haven't dealt with your required behavior changes — don't spent time worrying about mine.

Here are the Global Warming counterfacts (partial list):

- * 1992 — "Warning to Humanity" petition circulates, signed by 1,700 working CREDIBLE scientists.

- * 1992 — Oil, Coal, pollution—industries counter—attack at Rio conference, fake Heidelberg Appeal circulates with their funding, using their paid—science—traitors, like the documented corrupt Fred Singer, documented corrupt Fred Seitz, documented corrupt Bruce N. Ames.

- * 1997–1998 — hottest ocean temperatures ever recorded in human history.

- * 1998 — hottest year in recorded human history.

- * 1998 — 86% of all corals bleached, came 2 degrees from known heat—death of species, and 10 days away from known heat—associated digestion failure starvation deaths. No fossil record shows such massive simultaneous incident ever in global geologic history other than 5 mass extinction incidents.

- * 1999 — strongest super—cyclone (310km/h winds) in human recorded history hits Orissa, India. 1.9 million houses damaged or destroyed, 10,000 people swept out to drown at sea.

- * 2002 — Severe droughts on five continents simultaneously — at one moment the crops to feed one sixth the human race are threatened by brutal killing weather.

- * 2002–2003 — Worst drought in Australia recorded human history leads to wildfires invading Australian capital city and burning down hundreds of city blocks. At one moment not long afterwards a 250 kilometer firefront threatened to engulf the entire largest city in that country, Sydney.

- * 2003 — More people displaced by flooding than any year in recorded human history, over twice the geographical area flooded than second—worst flood disaster year in recorded human history.

- * 2003 — 562 tornadoes sweep the USA in ten days — largest swarm of tornadoes ever recorded in US history, almost three times worse than previous historical record.

- * 2003 — Largest hailstone in human recorded history falls in Nebraska, 18 inches diameter, "cannonball size" which denialists say is impossible according to THEIR understanding of physics. Canteloupe—sized, softball—sized, baseball—sized, golf ball—sized all fell in 2003 hell storms.

- * 2003 — Weeks of unrelenting pounding of constant storms finally break northeast US power grid, 50,000,000 utility customers blacked out in US and Canada. Indiana governor, Frank O'Bannon, dies of heart attack from stress of one declared sequential "state of emergency" after another. Indiana, Ohio, Pennsylvania, Illinois, Toronto especially hit hard.

- * 2003 — Worst forest firestorms in Portugal's recorded human history, blamed on excessive heat and changed air currents denying rainfall.

Re: Does Psalm 110 really work for Big Industry?

sci.energy.hydrogen: Re: Does Psalm 110 really work for Big Industry?

* 2003 — 20,000 forest fires in Russia, 16,000 of them before the heat of summer, the largest number in human recorded history.

* 2003 — 1,400 heat–stroke deaths in Andhra Pradesh, India from sustained heat wave and delayed monsoon — largest mass heat–killing in local recorded human history.

* 2003 — 35,000 excess heat–stroke deaths across Europe, largest mass heat–killing in European recorded history.
