Re: What Ghost slipped and busted his ass Group: sci.physics  
Date: Fri, Oct 28, 2005, 2:03am (EST+1) From:  
GravityPhysics@xxxxxxxxxx (tj Frazir) Its running 4000 stroke  
inches of intake per minute .. thats gas air  
mix .at 6:1 compression . The lpe uses 600 inches intake per  
minute. same gas ar mix  
plus o2. 20 inch stroke at 60 strokes per minute driving a 24  
inch rotor  
500 rpm. I drive a 1930 cad v16 or a silver ghost . Anyway  
,,the rotor looks like a hub or dish with a shaft -{ <  
inner wheel cam and its actlulator sticks out the other side  
and the T  
directors sit against the wheel cam actulator so if ou move  
the inner wheel up the  
top T slides up for vane clearance and move itdown the botom T  
coves  
away from the rotor maintaining vane clearance . The rotor  
sits between the 2 water rocket cylinders . A  
floating magnetic hockey puck looking thing moves up and down  
with the  
water and is smaller then the cyliner so its sloppy in the  
cylinders . The cylinders have a small inside pipe and thats a  
cylinder  
too , it will fire first and ram up the compression befor  
theycylinder  
fires. electr c direct injectors ,,the off the shelf new ones \$  
900 each .  
the o2 injectors come from telliidine . U the engine looks  
like a U . the whale 8 uses cone shaped pipes and 2 on each  
side make up a  
cylinder . that way it can leve one cylinder full and run the  
small 12 inch  
rotor or run boath ( 4 cylinders 2 at a time ) and run the 24  
inch . ..... The gas in  
your car is 10 % effective BUT the lpe not only uses  
the gas air but uses the steam too as the water runs at 450  
deg F . The valves are up the pipes at 30 inch as a cylinder

Re: Lpe will end oil age

but the pipe is taller so any water gets past the valve its still in the pipe . But it never gets past the valve . air compressor 1 hp runs the air intake and insjects cool air into the cylinder wile the water moves up and knocks the boil flat for 1/2 sec. but thats not the intake 100 % ,,when the water is up to line the top valve closes and the head air intake via compresor puts 100 psi or so in the top inch thats left when the cylinder is full. small pipe direct injected 1/50 sec befor the cylinder di direct injects gas and o2. 24 inch rotor is the rear end pig with 2 cylinders driving it . No trans . no waisted heat .  
..... its a very simple engine .  
USA just can not afford to ignore it. natural gas is 14 bucks 1000 cf. its 2 bucks evry place else on the planet. 80 % of the things usa makes needs it so 80 % of the goods can not stay in bizz much longer.  
People dont see whats comming. 4 years gas went up 300 % and natural gas went up 600 % and wait till jan this winter andyou wount understand your bills. Bush blew 10 trillion out his ass to boot. USA is in far more trouble then they know. On top of that , uncle sam wants me dead . 1 % of the population is getting rich beond comprehension as BUSH is LOOTING usa dry. .... who is going to save usa ? I have 1 million engines and when bush gets out Ill have 10 million. BUT the few people that understand this engine and live in usa will be so rich so quick bill gates will look like an amature. I herd a seneter say ,,The cruiseship owner moved from usa but still lives in usa . well that hurt because I dont make the rules. and cruise ships are a side line ,,they never call me the paper giant and forest is what I do. I loose money on cruise ships and make it back on container ships for waltons and parkng bulkers ....and now a brazil farm ...I worked my fucking ass off. what for ? I dont nead it . They tell me 35000 faimlies are dependent on me not stopping and no one can take it all over I cant replace my self if I could I would hand the fucker evrything and just go away with 100 mil and my ice breaker. I gave ford honda GM navy doe ..evryone got an engine

Re: Lpe will end oil age

Re: Lpe will end oil age

, but  
they are all crooked as fuck and would rather loot usa dry and  
then move  
away . This is more then the end of the oil age . If I dont  
end it  
,,in 20 years usa will end. the usa population is blind to  
whats going on. 30 year war against  
the poor for the last 30 years. LPE is this planets only  
chance.  
or you have seen the last of Great usa. Im going to winn or  
die trying. AND DONT think this world wount read these in a  
few years . Once you  
look LPE over real good and real honest ,, youll know its  
true. some one could make my engines even better. not just my  
engines  
but americas engines. I gave them to usa with no intension of  
anything but helping  
usa servive. But all the crooks want to do is loot usa dry so  
they can get out  
rich and lee a depression behind so big usa will colaps. 40  
million cant go see a doc .  
70 mil cant pay thier bills. You might not think usa is in  
deep shit .. its in over its  
head . PLE can wipe the slate clean . I beet the fuck out of  
these engines in all conditions and I know what  
rock solid is. I have 4 billion in them now and counting. You  
all might think its a  
joke .. but its no joke ,, evry one of you have brains enough  
to understand the  
bottom line . YOUR house your kids you your self are at stake  
and were not  
talking 20 years down the road. were there now. The GOV has  
irresponcibly put the end of usa in motion big  
time. then what ? then rasha gets nuked usa is over and who  
will run this planet ?  
I started a long time ago ..I understand the reality of money  
.  
you cant ride a country in the red forever. people will die  
starve and Im  
talking aabout all of you and your kids . usa is not carved in  
stone . we can save it all or just joke around till its over.  
mabe it takes a  
stone cold sober giant to sit in the dark of the sea and think  
ahead all the time . if I ever stop thinking ahead Ill be  
at the bottom of the sea for good. even if the lpe turns the  
markets up side down we winn and the  
middle class and poor will be much better off ..only the top 1  
% will  
loose thier asses. its the top 1 % that looted usa dry anyway.  
70 % of usa are  
in fear but are not shure why . no one feals very solid. if

Re: Lpe will end oil age

they only knew !!!!!  
they wount listen . most of it is too big for them to  
comprehend . energy is making  
them unable to compete in the world market place . as usa is  
now ,,its not sustainable and is ending . iF I  
cant explain it to anyone in this NG how can I explain it to  
mainstream usa ? IF you people dont understand then no one  
esle will. till its too  
late

well send me an engine

I want one.

.
