bill remember the baby and the bathwater.
You know i'm wrong?? be
careful, there's a whole bunch of
neurobiology linked to sonar and
light energy and the way photon and phonon
energy is stored inside the
DNA. our memories are linked to the way
gluons are used to store
memory.

Now see, that's why I'm so careful not to say you're wrong.
All the
neurobiology linked to sonar and light energy and the way
photon and phonon
energy is stored inside the DNA!"Yeah... imagine if the
subatomic particles were really entire worlds...."

Didn't that garbage get first uttered from some loser's acid trip about 40
years ago?I think the 'acid trip' is wrong; it was probably first Pythagorus
who

Re: self-field theory

first tripped out on reality, thousands of years before our hippie friends!!

well SFT DOES suggest a FRACTAL field structure. ie there appears to be a field structure at the sub-photon level. And also a 'multiverse' cosmological structure I'm not sure if this is what you're referring to. Entire worlds maybe not, but wheels within wheels as the ancients were saying seems correct.
