How many tons of *electrolytically
manufactured* hydrogen have you sold to
date ?

\$24 billion worth. 1/3 of it will be used to upgrade lower
rank
fuels, 2/3 will be burned directly.

And when will you deliver these 30 million tons ?

30 billion you mean

No, I meant 30 million tons. As in \$24 bn/ \$800 per ton.

– these are 40 year contracts with first deliveries in 2011.

OK. Good luck with that.
