No.

But this could:

Dead hindus could be used as fuel. Energy can be harnessed even from rotten bananas; so why not a dead Hindu ?

Do not cremate them and waste their useless bodies, instead you could use them as fuel. This could be a good solution for the energy crisis India is facing. Maybe then petrol would become cheap as chips in India and export of carcasses could reel in foreign exchange.

"Burn a dead hindu, save petrol"

.
