As far as we know, this was the first ever drive from Los Angeles (County) to Las Vegas in an electric vehicle without stopping to charge.

Interstate 15 to Las Vegas includes two climbs, the Cajon Pass and Baker Grade, both with about 3500 feet of elevation gain. The tzero never faltered and arrived in Las Vegas, 245 miles from AC Propulsion headquarters in San Dimas, with at least 40 miles of reserve range.
