Ever considered what a waste of energy and time some of this packaging is that we are given with our purchases,.

Fair enough some of the packaging is a necessary evil that we must have to protect articles in transit, but there should be a policing of all avoidable extra rubbish, toiletries are some of the worse culprits, to name and shame one FCUK is deplorable their packaging is criminal and definitely must cost more than some of the trash they sell in this over pompous poor quality product.

A boycott on all manufacturers that offend in this way should be instigated, this earth of ours cannot continue with it's unnecessary use of energy where it can be avoided.
