Try EZChemDB!

A free 15 day fully functional trial is available for download at:

www.makeitez.com

EZChemDB has temperature dependent properties for over 1700 chemicals. The data is well referenced, and is presented in an easy to use way. You can easily export all data to excel, or the program of your choosing! Give it a try when you get a chance.

I hope you find it as useful as I do!
