google.com Suction Gas Producer Power

If you have one of those rigs and access to cheap coal, you can make your own gas.

Gasssss,,,,,,,,,

cuhulin

Congratulations, Coal gassification goes back to the 19th century. Be careful, if your machine is working correctly, you are making carbon monoxide and hydrogen.

During WWII city buses and taxis in Europe ran off wood gasification.

If you want free plans, check the fema website.
